

RENEWABLE ENERGY FROM GREEN POWER FOR BUSINESS

IT'S THE BIGGEST \$3 INVESTMENT YOU'LL EVER MAKE

It only takes a little bit to start giving back to your community. An extra three dollars, to be exact. Because that's the cost of using one block of renewable energy—affordable, sustainable, “does the planet good” energy from wind, solar and biogas resources.

Of course, renewable energy isn't just good for the planet. It can help control our community's energy costs over the long haul. And studies show that consumers are more likely to buy products and services from companies who care about the environment.

So make an investment in renewable energy. Your customers will appreciate it now... and for years to come.

WHY RENEWABLE ENERGY?

IT'S CLEAN. And the more renewable energy we use, the less coal, oil and natural gas we'll burn. Which can have a dramatic effect on the air we breathe. In fact, using just one \$3 block of renewable energy each month keeps so much destructive carbon dioxide out of the air, it's like not driving your car for six months.*

IT'S SUSTAINABLE. Wind, biogas and solar will never run out—something that's simply not true of conventional resources. And because it is produced here at home, renewable energy can increase our energy independence.

IT'S SMART. Renewable energy isn't just good for your organization's image. In time, the increased use of renewable resources should buffer the US economy from big swings in the cost of coal, oil and gas. Plus, every dollar you spend on renewable energy gets reinvested in new, energy-efficient alternatives that will help control energy costs in the future.

JOINING IS EASY

Don't worry. There is no special equipment to install, and no change in the way your organization receives or uses energy. You can start (or stop) your participation at any time, and you can use as many blocks of green power as you like. Each one is the equivalent of 300 kilowatt-hours (kWh), so a few blocks every month could almost run your business.

We believe affordable public power strengthens our community and helps our neighbors. That's why, through WPPI Energy, we're partnering with other local not-for-profit utilities to share resources and lower costs.

The Green-e Energy logo helps consumers easily identify environmentally superior renewable energy options. For more information on Green-e Energy certification requirements, call 1-888-63-GREEN or log on to www.green-e.org
